

# Inventions that changed the World

## Family Challenge

Who or what do these pictures show? Try and find out a bit more about the people or objects.

In this topic we try to ask questions about why and how things have been invented. We also try to find out who designed many of the things we use every-day, maybe we should know their names? Encourage the children to ask about how things work or how they are put together. Have fun and remember, always ask who and how?

The Titanic under construction. What was the Titanic? Who designed it?
